

Application No. 09/934,201

includes a miniature LCD-type monitor which displays not only images taken by the camera module, but also incoming video messages. The camera module may communicate with the housing of the communication device by wired connection, or wirelessly. The camera module is of such small size that it can be stored within the housing of the communication device. The camera module may be pointed at any object within sight of the user, without having to move the phone housing in order to take video images. Any acceptable wireless standard may be used for wireless communication between the camera module and the video telephone. One particularly advantageous wireless standard includes Bluetooth.

REMARKS/ARGUMENTS

Attached hereto is a marked up version of the changes made to the abstract by the current amendment. The attached page is captioned "Version With Markings to Show Changes Made."

It is respectfully requested that the amended abstract be entered, and the Notice to File Corrected Application Papers be withdrawn.

Respectfully submitted,

SHERIDAN ROSS P.C.
